

PEST CONTROL PROGRAM

- The pest control at the University of Florida Meat Processing Center will be performed by the University of Florida Pest Control Department.
- We will have a monthly inspection and treatment of the building to control any unwanted pests.
- During that inspection any pests or infestations that are found will be logged on a pest control inspection report sheet and any treatments done will be logged as well.
- If there are any pest problems that arise between inspections, notify plant management personnel and or call the U.F. Pest Control Department @ 392-1904 to report the problem and to request immediate assistance.

Pest Control Inspection Report

USDA MEATS LAB Bldg. #459

Date Reported: _____ Reported By: _____

Date Treated: _____ Technician: _____

Rodent Control/ Pest Control (Circle One) Routine / Request
